Comcast Notice of Toll-Free Dialing to Reach 711

For access to Telecommunications Relay Services for people with hearing or speech disabilities

The FCC requires voice service providers to provide toll-free, three-digit 711 dialing for access to Telecommunications Relay Services (TRS). TRS facilitates telephone conversations between people with hearing or speech disabilities and people with or without such disabilities.

TRS uses operators, called communications assistants (CAs), to facilitate telephone calls between people with hearing and speech disabilities and other individuals. A TRS call may be initiated by either a person with a hearing or speech disability, or a person without such disability. When a person with a hearing or speech disability initiates a TRS call, the person uses a teletypewriter (TTY), another text input device such as a smartphone or a video phone to call the TRS relay center, and gives a CA the number of the party that he or she wants to call. The CA in turn places an outbound traditional voice call to that person. The CA then serves as a link for the call, relaying the text of the calling party in voice to the called party, and converting to text what the called party voices back to the calling party.

Dialing 711 to reach TRS makes relay access convenient, fast, and uncomplicated. TRS is available 24 hours a day, seven days a week and all calls are confidential. For more information about the various types of TRS, see the FCC's consumer fact sheet at [fcc.gov/trs](https://www.fcc.gov/trs), or visit the website of the Disability Rights Office (DRO) at [fcc.gov/accessibility](https://www.fcc.gov/accessibility).

Reliability you can count on.

Thank you for choosing us as your connectivity provider. We appreciate your business and would like to offer you a **personalized one-on-one account review** to make sure of two things — that you've got the right service package for your business, and that you're getting the best value for you.
